

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) Aramid fibrils having in the wet phase a Canadian Standard Freeness (CSF) value less than 300 ml and after drying a specific surface area (SSA) less than $7 \text{ m}^2/\text{g}$ and a weight weighted length for particles having a length $> 250 \text{ }\mu\text{m}$ ($\text{WL}_{0.25}$) less than 1.2 mm.
2. (Original) The fibrils of claim 1 wherein in the wet phase the CSF value is less than 150 ml and after drying the SSA is less than $1.5 \text{ m}^2/\text{g}$.
3. (Currently Amended) The fibrils of ~~any one of claims 1-2~~ claim 1 wherein the aramid is para-aramid, ~~preferably poly(para-phenylene terephthalamide)~~.
4. (Currently Amended) A method of preparing the fibrils of ~~claims 1-3~~ claim 1 comprising the steps
 - a. polymerizing an aromatic diamine and an aromatic dicarboxylic acid halide to an aramid polymer, in a mixture of N-methylpyrrolidone or dimethylacetamide and calcium chloride or lithium chloride, to obtain a dope wherein the polymer is dissolved in the mixture and the polymer concentration is 2 to 6 wt.%,
 - b. converting the dope to fibrils by using a jet spin nozzle under a gas stream, and
 - c. coagulating the fibrils using a coagulation jet.
5. (Original) The method according to claim 4 wherein at least part of the hydrochloric acid formed is neutralized to obtain a neutralized dope.
6. (Original) The method according to claim 5 wherein the η_{rel} (relative viscosity) of the aramid polymer is between 2.0 and 5.0.

7. (Currently Amended) A paper made of constituents comprising at least 2 wt.%, preferably at least 5 wt.%, most preferably at least 10 wt.% of the aramid fibrils of ~~any one of claims 1-3~~ claim 1.

8. (New) The fibrils of claim 1 wherein the aramid is poly(para-phenylene terephthalamide).

9. (New) A paper made of constituents comprising at least 5 wt.% of the aramid fibrils of claim 1.

10. (New) A paper made of constituents comprising at least 10 wt.% of the aramid fibrils of claim 1.

11. (New) A paper made of constituents comprising at least 2 wt.% of the aramid fibrils of claim 2.

12. (New) A paper made of constituents comprising at least 5 wt.% of the aramid fibrils of claim 2.

13. (New) A paper made of constituents comprising at least 10 wt.% of the aramid fibrils of claim 2.

14. (New) A paper made of constituents comprising at least 2 wt.% of the aramid fibrils of claim 3.

15. (New) A paper made of constituents comprising at least 5 wt.% of the aramid fibrils of claim 3.

16. (New) A paper made of constituents comprising at least 10 wt.% of the aramid fibrils of claim 3.
